

Navanith J Shekha

Data Annotator — Computer Vision & NLP Training Data

navanithshekha07@gmail.com | +91 98955 80624 | linkedin.com/in/navanith-j-shekha-85505b1ba | Bangalore, India

SUMMARY

Data Annotator with 4+ years labeling and quality-checking image and text datasets for computer vision and language models. Experienced across bounding box, polygon, keypoint, and semantic segmentation annotation, with accuracy consistently landing at 95–97%. Background spans agricultural computer vision (crop detection, spray alignment) and automotive AI (face recognition, driver monitoring, gesture recognition).

EXPERIENCE

Data Annotator — Niqo Robotics, Bangalore

May 2023 – Present

- Annotated 6,000+ image datasets using CVAT for computer vision model training, sustaining 97% labeling accuracy through bounding box and semantic segmentation.
- Partnered with ML engineers to refine annotation guidelines, improving dataset consistency and downstream model quality.
- Built a Python script to generate V-Maps and cross-validate against video data for spray-pattern alignment.
- Owned crop-dataset data management end to end — uploads to MinIO, retrieval and segregation via Amazon S3.
- Used FiftyOne to audit datasets and evaluate model performance, curating failure cases and routing re-labeling tasks back into CVAT.
- Ran detection experiments across multiple crop types, contributing to 97% entity-recognition accuracy in the crop-detection model.

Data Annotator — Mercedes-Benz Research and Development India, Bangalore

June 2022 – April 2023

- Labeled 2,000+ image datasets on the in-house IRA Annotation Platform, holding 95% accuracy under tight deadlines.
- Contributed to Face Recognition, Head Orientation Detection, Driver Monitoring, and text-based Tire Annotation projects.
- Supported data collection for gesture-recognition model training across multiple projects.

SKILLS & TOOLS

Annotation Techniques: Bounding Box, Polygon, Keypoint, Semantic Segmentation, Text Annotation

Platforms: CVAT, Labelbox, Kili, FiftyOne, IRA (in-house)

Quality & Data Ops: QA Validation, Error Categorization, Amazon S3, MinIO, Excel

Technical & Collab: Python (scripting), JIRA, Notion, Linux, ML-team collaboration

EDUCATION

Diploma in Mechanical Engineering — P.A. Polytechnic — 2021

Pre-University (PCMC) — Parijnana INDP PU College — 2018

SSLC — S.S.N.V.P. Kondevoor — 2016

ACHIEVEMENTS

- Improved annotation efficiency by 97% through workflow and tooling refinements.
- Helped train a crop-detection model that reached 97% entity-recognition accuracy.
- Entrusted with additional crop data-management responsibilities by team lead and manager.
- Recognized by management for completing large-scale, high-accuracy annotation under short timelines.
